

**AMENDMENTS TO THE CLAIMS**

Please **CANCEL** claim 21 (the first one) without prejudice or disclaimer.

Please **ADD** claim 30 as shown below.

Please **AMEND** claim 25 as shown below.

The following is a complete list of all claims in this application.

1-12. (Cancelled)

13. (Previously Presented) A display device, comprising :

a mold frame including a series of optical sheets;

a bottom chassis assembled to said mold frame;

a top chassis assembled to said mold frame;

a display panel positioned between said bottom chassis and said top chassis;

a printed circuit board (PCB) connected to said display panel; and

a grounding protrusion formed on a surface of said PCB,

wherein the ground protrusion is protruded higher than any other components formed on the surface.

14. (Previously Presented) The display device according to claim 13, wherein said mold frame accommodates a lamp assembly and a reflector.

15. (Previously Presented) The display device according to claim 14, wherein said display panel is positioned onto said optical sheets.

16. (Previously Presented) The display device according to claim 15, wherein said PCB is connected to said display panel via a tape carrier package (TCP), and fixed to said bottom chassis by a fixing means.

17. (Previously Presented) The display device according to claim 16, wherein said grounding protrusion are formed on said PCB where a signal transmission pattern is not formed.

18. (Previously Presented) A display device, comprising:

a chassis;

a display panel assembled with the chassis;

a printed circuit board (PCB) connected to the display panel; and

a ground protrusion formed on a surface of the PCB,

wherein the ground protrusion is protruded higher than any other components formed on the surface.

19. (Previously Presented) The display device of claim 18, wherein the PCB comprises a grounding pattern, the ground protrusion being protruded from the grounding pattern.

20. (Previously Presented) The display device of claim 19, wherein the PCB further comprises a driving integrated circuit (IC) and a signal transmission pattern.

21. (Cancelled)

22<sup>22</sup>  
21. (Previously Presented) The display device of claim 19, wherein the PCB is attached on the chassis.

23<sup>23</sup>  
22. (Previously Presented) The display device of claim 21<sup>22</sup>, wherein the PCB has a screw hole and attached to the chassis by a screw.

24<sup>24</sup>  
23. (Previously Presented) The display device of claim 22<sup>23</sup>, wherein the screw hole is formed on a corner of the PCB.

25<sup>25</sup>  
24. (Previously Presented) The display device of claim 23<sup>23</sup>, wherein the ground protrusion is in direct contact with the chassis.

26<sup>26</sup>  
25. (Currently Amended) The display device of claim 18, further comprises a tape carrier package (TCP) ~~flexible printed circuit board (PCB)~~ coupled between the display panel and the PCB.

<sup>27</sup><sub>26</sub>. (Previously Presented) The display device of claim 18, further comprises a mold frame assembled with the chassis.

<sup>28</sup><sub>27</sub>. (Previously Presented) The display device of claim 18, further comprises a backlight assembly unit.

<sup>29</sup><sub>28</sub>. (Previously Presented) The display device of claim <sup>28</sup><sub>27</sub>, wherein the backlight assembly unit comprises a lamp, a reflector and an optical sheet.

<sup>30</sup><sub>29</sub>. (Previously Presented) The display device of claim <sup>29</sup><sub>28</sub>, wherein the backlight assembly unit further comprises a light guiding plate.

<sup>31</sup><sub>30</sub>. (New) The display device of claim 19, wherein the PCB further comprises a via hole.
